Nancy Caroline

American Academy of Orthopaedic Surgeons (AAOS)

Series Editor: Andrew N. Pollack; Editors: Bob Elling and Mike Smith

Jones and Bartlett Publishers, 2007

ISBN 13: 9780763729073 (Hardback); ISBN 10: 0763729078

Price: \$AUD190.00 (RRP)

Few paramedics around the world have not heard of Nancy Caroline. Known as the 'Mother of Paramedics', Caroline's contribution to paramedic education, training and professional development is arguably second to none. The work of Dr Caroline and others, such as late Peter Safar, revolutionised EMS in the US and around the world. Dr Caroline's involvement in EMS commenced in Pittsburgh in the early 1970's. In 1974, the University of Pittsburgh received a grant from the US Department of Transportation to create a curriculum for emergency medical services. In collaboration with Dr Peter Safar, Dr Caroline authored the 15 module curriculum originally presented in two bound volumes, and later published in 1979 as "Emergency Care in the Streets". Dr Caroline passed away in 2002, but the American Academy of Orthopaedic Surgeons has continued Nancy's legacy with this, the sixth edition of *Nancy Caroline's Emergency Care in the Streets*. It is everything we have come to expect from the late Nancy Caroline, and more.

There is something for every paramedic in *Nancy Caroline's Emergency Care in the Streets: 6th Edition*, both novice and expert alike. Covering comprehensively the 1998 U.S. Department of Transportation (DOT) EMT-Paramedic National Standard Curriculum, the text is an exemplar of what good textbooks are all about. It is visually stimulating, comprehensive, colourful, easy and enjoyable to read, and blends clinical vignettes and case stories seamlessly to enhance the reality of learning. The 2480 page manual is divided into 7 formatively structured sections, including:

- Section 1. Preparatory
- Section 2. Airway
- Section 3. Patient Assessment
- Section 4. Trauma
- Section 5. Medical
- Section 6. Special Considerations
- Section 7. Operations

- Appendices

Impressive features of this edition include:

- Case studies that develop students' learning from beginning to end of case
- Captions providing 'Field Notes' with practical in-the-field advice
- Classic 'Notes from Nancy', with words of wisdom and experience Dr Caroline
- Blended cartoons and artwork signature of Dr Caroline's emphasis on the use of humour and fun in learning
- Sets of Skill Drills accompanied by written step-by-step explanations and visual aids of core skills and procedures
- A review DVD demonstrating a variety of ALS skills and procedures.

Each chapter ends with a 'Prep Kit' and 'Vital Vocabulary' that summarise key points and concepts from the topic area. Following this is an 'Assessment in Action' section that provides cases studies to apply the learning, and other 'Points to Ponder' for future consideration. The appendices incorporate cardiac ALS and assessment-based management, medication formulary and glossary. The main text is supported by an Instructors Resources and Teaching Package, Student Resources and Workbook, and Technology Recourses within an interactive website. This complete package provides a comprehensive learning package and system for paramedic education, training and professional development.

Nancy Caroline's Emergency Care in the Streets: 6th Edition has something for everyone—paramedics, doctors, emergency nurses, first responders and first aiders alike. Few texts can claim global acclaim and reputation within a practice discipline. *Nancy Caroline's Emergency Care in the Streets: 6th Edition* is one such publication.
